CIVILIZATION RECODED.

A Sovereign Infrastructure Prototype Integrating RealAIIDTM Biometric Architecture with Oceanic Compute Cycles.

SOLOMON KIN LLC // IP ARCHIVE V2.0

CLIMATE RESILIENCE

Protecting the Investment from Global Volatility

THE DOME FIRMAMENT

- **Total Atmosphere Control:** A carbon-reinforced electromagnetic dome protecting all inhabitants from chaotic weather.
- **Uninterrupted Activity:** Internal ecosystem remains static regardless of external oceanic conditions or storms.
- **Self-Cleaning Nanotech:** The dome surface utilizes micro-robots to maintain perfect transparency and solar efficiency.

The Island Dome

45° WALL SHIELD

In the event of storm surges or rising tides, hydraulic-actuated 45-degree defensive walls raise instantly from the ocean bed.

- **Kinetic Energy Dispersal:** The angled design breaks wave force, preserving island structural integrity.
- **Dormant Layout:** Walls lay flat during calm weather, allowing the neon aesthetic to reflect off the ocean surface.
- **One-Touch Deployment:** Central Operator Hub can raise the perimeter in under 120 seconds.

SUBMERGED SODR RING

Thermal Cooling
Leveraging deep-sea temperatures to cool petascale compute arrays with zero energy waste.

HDS Capsules
High-Density Storage capsules located 200m below the surface for maximum security and stability.

Oceanic Power
Powered by kinetic wave energy and internal nuclear batteries, ensuring 99.999% uptime.

INFRASTRUCTURE SPECS

SYSTEM COMPONENT	SAFETY RATING	RESPONSE TIME	STATUS
Firmament Dome	CAT-5 Hurricane+	Passive / Instant	ACTIVE
45° Hydraulic Perimeter	TSUNAMI GRADE	< 120 Seconds	DORMANT
RealAIID Handshake	MIL-SPEC AES-256	< 50ms	SYNCED
SODR Deep Compute	UNDERSEA STABLE	N/A	CHILLED

NEPTUNE'S LEDGER

The World's First Undersea High-Stakes Digital Dining Experience. Transparent vistas into the Submerged Compute Ring.
