SOVEREIGN TECH STACK

RealAIID Integration

The fundamental digital identity layer. Every interaction—from opening hotel doors to controlling utility drones—is authenticated via a biometric handshake.

```
AUTHENTICATE: USER_SESSION
PROTOCOL: BIOMETRIC_HANDSHAKE_V3
ENCRYPTION: AES_256_GCM
```

The Core Sphere

SUB-SURFACE COMPUTE

Abyss Gallery Undersea

SODR (Submerged Oceanic Data Ring)

By placing high-density server capsules in the deep abyss, we achieve passive cooling and extreme physical security.

- Zero-Energy Cooling
- EMP-Shielded Vaults
- Liquid Immersion Reliability
